

MariPet

Innovative curriculum to evaluate MARine fishery discards as raw PET food for sustainable Europe

The MARIPEP project, which aims to reduce waste in fisheries, has a very important original value that covers 5 important goals of the United Nations development goals, namely life underwater, responsible production-responsible consumption and quality education, with the contents of climate change and end hunger.

2021-1TR01-KA220-VET-000024755

RECENT EVENTS

Maripet 2rd Meeting: Iceland has had 2 multiplier events or dissemination activity. On 22nd April we introduced the project at a dog breed expo in Reykjavik and got feedback on feasibility of using discarded fish for pet food from dog breeders. On April 25th, we introduced the project to students at AUI that study Agricultural Sciences at our campus in Hvanneyri, Iceland.

Within the scope of the MARIPEP Erasmus+ vocational training project supported by the Turkish national agency, aquaculture engineers, veterinarians, food engineers, agricultural engineers, fishermen and pet food producers constitute the primary target professional groups. Within the scope of the MARIPEP project, coordinated by Ege University Faculty of Fisheries and carried out by Assoc. Prof. Dr. İlker AYDIN, training activities will be carried out on the production of a food in which discarded fish fillets are used instead of the mixture obtained from terrestrial animal meat in the raw food content. The Erasmus+ project, which will last for 24 months under the leadership of Ege University and involves 7 partner organizations in total, includes Balıkesir University and İzmir Metropolitan Municipality from our country, while Norway, Iceland, Croatia and Lithuania support Ege University as international partners. The project aims to reduce waste in fisheries, ecological and economic development by raising awareness of the use of discarded marine products in feeding dogs and cats.

ICELAND

The main results of the MARIPEP will be: ● Innovative curriculum including 5 modules with training courses. ● A virtual dedicated environment with an online education kit. ● Establishment of discard fisheries and pet food trainers/experts platform-European Discard Fisheries and Pet Food Production Guidebook/e-book. ● Training workshops. ● Multiplier events in five countries. ● Quality Management and dissemination reports.

MARIPET PROJECT

What's next?

The 4nd meeting will be held on Kaunas-Lithuania - 10-11 of January 2023

Coming Events

Dissemination meetings of the Maripet Project will be organized in Izmir, Türkiye. Three dissemination meetings will be organized on 12 and 30 May and 1 June.
